

Pixel Repair System

The Thruput Pixel Repair System is a tool for restoration of normal operation to monitors that have developed a ghosted image, or frozen pixels during their operational life.

The system uses the Thruput Videomax to drive high-resolution monitors.

The Thruput Pixel Repair System provides:

- Restoration of normal monitor function
- The full screen resolution is addressable
- Able to improve or remove from any monitor
 - Ghosted images
 - Frozen pixels
- Able to drive high resolution monitors including:
 - 28" 2048 x 2048
 - 30" 2560 x 1600
- Fully portable

Pixel Repair System Mobility

Fully portable, the Thruput Pixel Repair system is supplied with interfaces for low and high-resolution monitors.

System is able to remove ghosted images, and restore normal pixel function in many situations.

For best effect, the tool needs to be used on a regular basis, and as soon as the problem is detected.

System Compliance

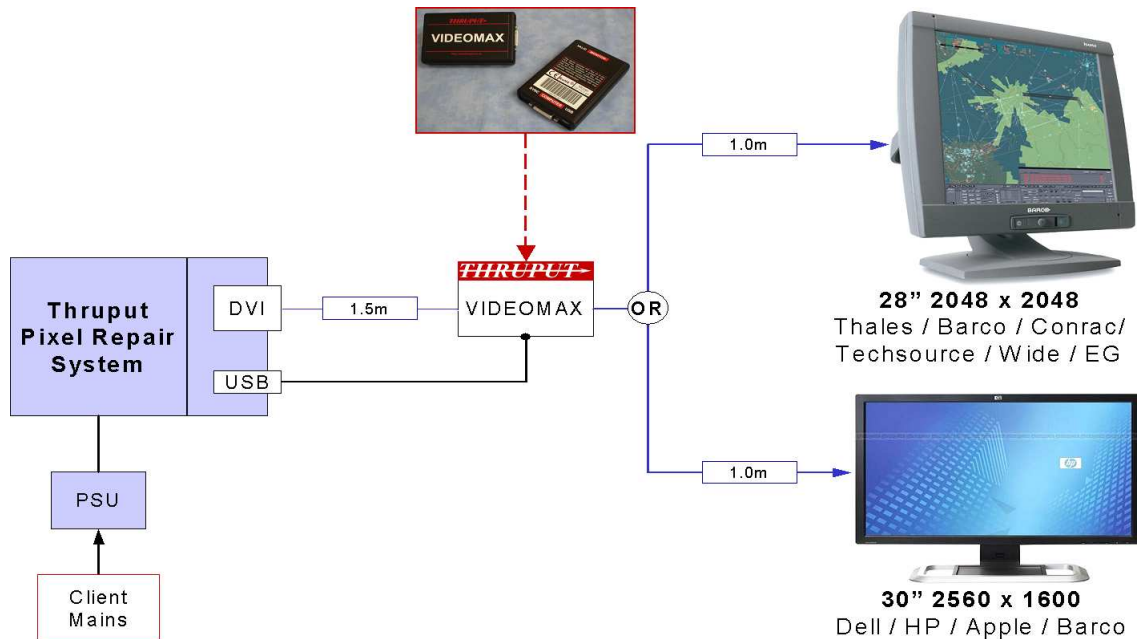

The Pixel Repair system is independent of the Operating system and application software that has caused the ghosted image.

The system can be operated on any Sun, Apple or Windows compatible monitors.

Although not all pixel problems are repairable, the Thruput Pixel Repair

Repair Configuration

Thruput Pixel Repair (and Colour Calibration) Systems are compatible with any monitor resolution and are wholly independent of the data source.
